**41 Data Breaches** of 6561 members and 2 domains

**24 High risk** | **17 Low risk**

Breached Website	Compromised Data
Coder.net	Password hash, Phone, Zip, Date of birth, Company name, State
Light.net	Password hash, Email, Password

## Identify breaches early before they harm your business

Learn if any of the credentials, payment information, emails, or company domains have been compromised with the most robust breach scanner offered by a password management tool. With Breach Monitoring your team will be notified automatically as soon as any security issue with their accounts is detected.

## Automate processes with NordPass business password manager

Thanks to autofill powered by machine learning, your credentials and data appear automatically when needed.

SECURE SHARING

## Share access between teams to make collaboration easy

Remove bottlenecks that stall deadlines. Share an unlimited number of digital entry points that you can assign to different departments or teams. Members get access to shared credentials, payment information, and other sensitive data immediately.

## Bring the entire team up to speed quickly

**Get real-time breach alerts related to your accounts**

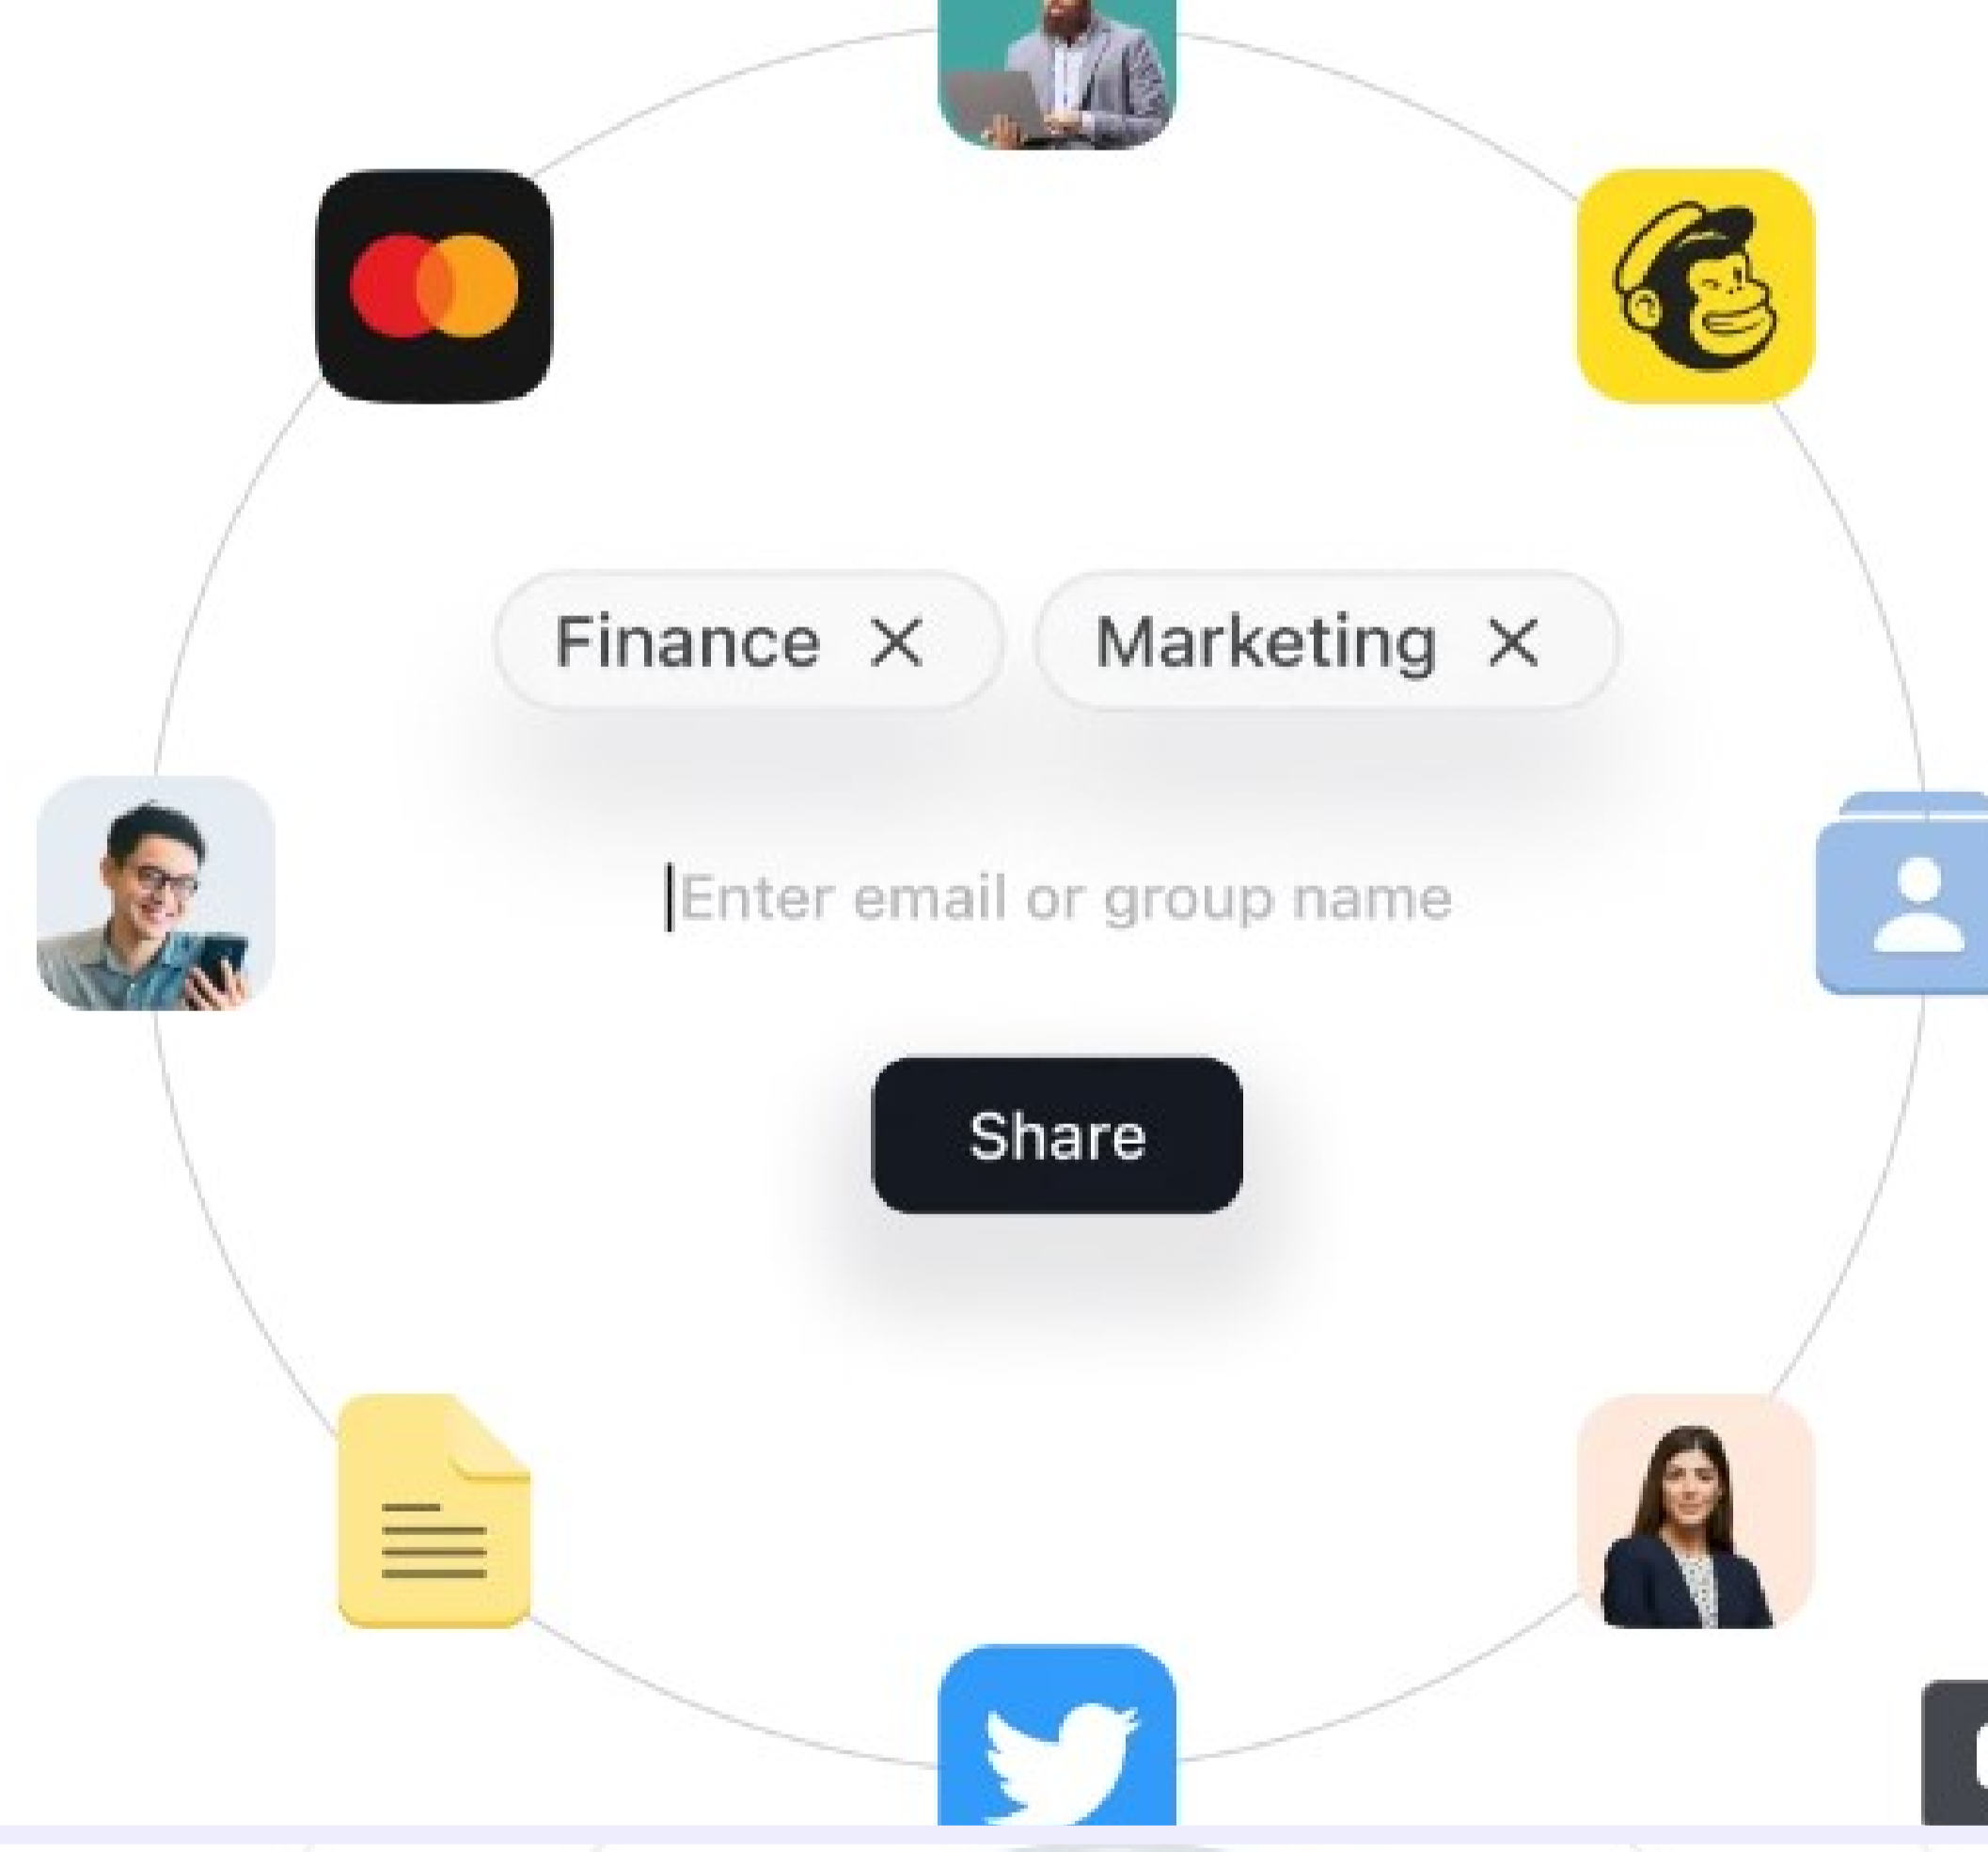

Stay alert with Breach Monitoring — a tool that proactively scans the web for data breaches that involve your email credentials and

### Store payment methods

Store payment details in an encrypted vault to make software and supplies purchases in just seconds. A sticky note is no place for corporate credit card details.

### Save personal and office details

Keep contact information and work addresses close at hand to provide to partners or vendors with required information in no time.

**Your email was found in a recent breach. View Breach Report.**

Today at 12:48 PM

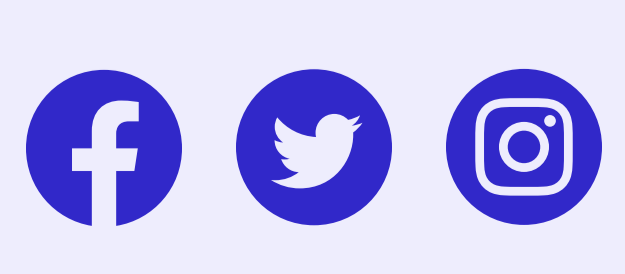

### Organize your account credentials

Save logins for all your accounts in one secure place. Each password can be automatically created for you with the Password Generator: get strong, unique credentials in an instant.

### Keep sensitive data safe

Give alarm PINs, Wi-Fi passwords, and recovery codes a safe home — where they're securely accessed by others and updated when needed.
