ABOUT EVAL OMAR

Eval OMR software is a state of the art Optical Mark Reader software for capturing and analyzing data from plain paper OMR (bubble) sheets with 100% accurate results and speed. Its simple yet sophisticated User Interface (UI) design makes it very easy to create, process, and analyze OMR data for user applications. Best suited for quick and accurate evaluation of sheets such as tests, assessments, surveys and filled forms.

Simple 5 Step Process

1 Design your own OMR sheet using MS Excel based Form designer. Can modify from a number of existing templates or create new OMR designs.

2 Print in-house in B&W using a simple printer (inkjet or laser) or MFP on plain paper. Works with standard 70-100 gsm A4 paper. Can even use photocopies.

3 Scan using any document scanner. Could be a flatbed or ADF. No fancy hardware investment required.

5 Swift software with a processing speed of 300-500 sheets per minute. Proactive error detection and correction to ensure 100% accuracy.

4 See advanced results with professional reports and graphs Export reports in formats like CSV, MS Excel, PDF, DBF.

- CBSE Term 1 examination for Class X and XII
- CBSE approved OMR design patterns and templates
- NEET new format template
